Part Replacement Instructions

BEFORE YOU BEGIN

1. Unplug the computer.

2. Ground yourself.

   Note: Before doing any work inside your computer, ground yourself by touching a metal part of the computer frame.

   CAUTION: This product contains components that are easily damaged by Electrostatic Discharge (ESD). To reduce the chance of ESD damage, work over a non-carpeted floor, use a static dissipative work surface (like a conductive foam pad), and wear an ESD wrist strap that is connected to a grounded surface, like the metal frame of the PC.

REMOVE HARD DISK DRIVE COVER

1. Raise the display (monitor).

2. Hold down the lever (A).

3. Pull up the vertical cover (A) and remove it from the chassis. Release the lever (B).
**REMOVE HARD DISK DRIVE**

1. On the hard disk drive cage, loosen three turns but do not remove the two bottom screws (A). Remove the top two screws (B).

2. Lift the hard disk drive cage up off the bottom screws. Disconnect the power cable (A) and the data cable (squeeze the connector to remove it) (B).

3. Remove the four screws (A) from the cage, and lift the hard disk drive from the cage.

**INSTALL REPLACEMENT HARD DISK DRIVE**

1. Place the replacement hard disk drive into the cage and insert four screws (A).

2. Connect the power cable (A) and the data cable (B) to the hard disk drive in the cage.

3. Place the hard disk drive cage over the bottom two screws (A) in the chassis and insert the top two screws (B).

4. Tighten all four screws.
REPLACE HARD DISK DRIVE COVER

1. Align and insert the hooks on the vertical cover (A) into the holes on the back of the chassis.
   - ![Diagram showing hook insertion](image1)

2. Reach beneath the display and hold down the lever (A).
   - ![Diagram showing lever hold](image2)

3. Slide the cover (A) down into place, and then release the lever (B).

---

REMOVE DVD DRIVE COVER

1. Remove the two screws from the horizontal cover.
   - ![Diagram showing screw removal](image4)

2. Press down on the horizontal cover (A) and pull out about 1/2 inch (1.27 cm).
   - ![Diagram showing lever press](image5)

3. Lift the cover (A) from the chassis.
   - ![Diagram showing cover lift](image6)
### REMOVE DVD DRIVE

1. Remove the cable (A) from the DVD drive (B).

2. Lift the tab (A) and slide the DVD drive (B) out of the chassis.

### INSTALL REPLACEMENT DVD DRIVE

1. Insert the replacement DVD drive (A) into the chassis. Slide the drive in until the tab (B) catches.

2. Reconnect the cable (A) to the DVD drive (B).

### REPLACE DVD DRIVE COVER

1. Place the horizontal cover (A) in position on the chassis with about 1/2 inch (1.27 cm) gap (B).

2. Slide the cover (A) toward the front of the computer chassis to close the gap; the cover should fit flush with the connectors.

3. Insert the two screws and tighten them.
